**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-6, are rejected under 35 U.S.C. 102(e) as being anticipated by Huth, et al, US. Pat. No. 6,519,263.

3. Claim 1, Huth teaches an Ethernet industrial control system for transferring a plurality of messages [*title, abstract*], wherein the messages are tagged with identifiers of varying levels of priority, ranging from a highest priority to a lowest priority [*col. 2, lines 11-15, 27-30*], the system comprising:

a serial network bus [*col. 1, lines 8-12*]; and

means for placing the message onto the bus, wherein a message having a higher priority identifier is placed onto the bus before placing a message with a lesser priority identifier onto the serial network bus [*col. 2, lines 11-15, 27-30*].

4. Claim 2, Huth teaches the levels of priority adhere to IEEE802 standards [*col. 1, lines 32-36*].
5. Claims 3 and 4, Huth teaches the message placing means is a fast communication, reduced UDP-IP stack [*col. 4, lines 34-38*].

Art Unit: 2116

6. Claim 5, Huth teaches a plurality of communication stacks, wherein the fast communication, reduced UDP-IP stack operates in parallel with the other communication stacks [col. 4, lines 31-41].

7. Claim 6, Huth teaches the communication stacks are dedicated to specific classes of messages [col. 2, lines 46-52].

***Allowable Subject Matter***

8. Claims 7-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

9. Claims 10-30 are allowed.
